28 Years Later

It's been almost three decades since the rage virus escaped a biological weapons laboratory, and now, still in a ruthlessly enforced quarantine, some have found ways to exist amidst the infected. One such group of survivors lives on a small island connected to the mainland by a single, heavily-defended causeway. When one of the group leaves the island on a mission into the dark heart of the mainland, he discovers secrets, wonders, and horrors that have mutated not only the infected but other survivors as well.

Smurfs

When Papa Smurf (John Goodman) is mysteriously taken by evil wizards, Razamel and Gargamel, Smurfette (Rihanna) leads the Smurfs on a mission into the real world to save him. With the help of new friends, the Smurfs must discover what defines their destiny to save the universe.

Jurassic World: Rebirth

Five years after the events of Jurassic World Dominion, the planet's ecology has proven largely inhospitable to dinosaurs. Those remaining exist in isolated equatorial environments with climates resembling the one in which they once thrived. The three most colossal creatures within that tropical biosphere hold the key to a drug that will bring miraculous life-saving benefits to humankind.
